

MG4U

Marine Genomics for Users

Work Package 5. Dissemination and promotion of MG knowledge to governance.

WP5 will prepare and deliver MG information to different target organisations involved in governance and sustainable management of the marine environment and its resources. WP5 will also involve a measurement of the knowledge uptake and impact of knowledge transfer to governance end-users.

Objectives:

- select methods and design products for transfer of MG information to target organisations involved in governance and sustainable management of the marine environment and its resources;
- transfer knowledge for governance;
- measure uptake of knowledge and impact.
