

MG4U

Marine Genomics for Users

Work Package 6. Project promotion, linkages and synergies.

Work Package 6 consists of diverse actions related to dissemination of MG4U activities to stakeholders and the wider public, namely the production of dissemination material including flyers, fact sheets, posters, a web portal and a knowledge database and any useful tools for the other WPs.

Objectives:

- To disseminate and promote the project (i.e. its objectives, methodological approaches, activities, partners, major events, products and outputs) through external communication activities;
- To interact with other related initiatives and projects to share methodology and results in order to prevent overlap/replication.
