

MG4U

Marine Genomics for Users

Work Package 4. Dissemination and promotion of MG knowledge to industry leaders.

WP4 deals with transfer of marine genomics knowledge to industry. It will define efficient methods to establish contacts between marine genomics scientists and interested industry representatives. Industrial workshops, conferences and other events will help to disseminate and promote marine genomic knowledge to biotechnology sectors especially in the areas aquaculture, fisheries and industrial biotech. WP4 aims at facilitating the planning of industry-academia collaborations to foster development of future marine genomics applications.
